

Moving your Microsoft 365 Licenses from Rackspace

Are you considering moving your hosting solution away from Rackspace?

Many companies are choosing to move their email solution from Rackspace to another provider. We hear many concerns about losing data, downtime, and security issues.

At Big Green IT, we provide a custom migration solution that is seamless, quick, and secure through Exchange Online and Microsoft 365.

What We Do

- Our licensing team will review your existing environment.
- We will provide you with a quote and answer any questions you may have.
- Upon your approval, we will engage our engineering team and transfer everything to Microsoft 365 through Big Green IT.

How We Do It

- Big Green IT uses custom transfer tools to move what we can whether you have an existing Microsoft tenant, IMAP email or are on Rackspace's hosted exchange.
- We will validate to ensure everything is complete and transferred.
- Our onboarding team will introduce themselves and welcome you to Big Green IT and communicate all support, billing, and Big Green IT contact info to you.

Why Big Green IT?

We make it our business to understand what companies need, simplify processes, protect data, ensure you have the right level of support and offer consultation when it's needed.

Big Green IT is a Microsoft Tier One, Gold Partner with a team of certified experts who help companies identify and deploy the right technology at the right time. We are here when you have a simple question, want to change licenses and/or investigate and expand your Cloud journey.

Most importantly, we care. The experience you have with Big Green IT is just as important to us as delivering powerful solutions that help your company be your best.
